ReplicaExpress

One Step Cloning Kit # OSC
(Available pack Size: 25 rxn & 50 rxn)

Cloning can be
as Simple as **You Want**

Replica Express: a Seamless Cloning Technology

Replica Express technology facilitates quickly and directionally clone the inserted (1 - 5) fragments to any place in any vector backbone.

Key Features:

- Widely Applicable:** T4-DNA ligase-independent system and is suitable for targeted cloning to almost any vector at any site. It can efficiently clone 50 bp - 10 kb fragments and carry out one step multi-fragment seamless cloning.
- Convenient Operation:** The linearized clone vector and PCR products can be cloned directly without purification. It only takes 5 - 30 min to complete the reaction.
- Design Simple:** Enzyme digestion is unnecessary. It only needs to introduce the homologous sequence at the end of the vector at the 5' end of the primer.
- Highly Efficient Cloning:** Achieved by using inefficient competent cells (10^7 cfu/ μ g), (DH5 α /XL10-not included). Independent of ligase and phosphatase, the positive rate of cloning is more than 95%.
- Applications:** Suitable for Fast-cloning, High-throughput Cloning, Seamless Assembly, Site-specific Mutagenesis.

Functional differences between ReplicaExpress products:

Features	ReplicaExpress One Step Cloning Kit (OSC)	ReplicaExpress Ultra One Step Cloning Kit (UOSC)
Number of fragments	Suitable for single fragment cloning.	High throughput and suitable for multiple fragments (1 – 5) cloning.
Reaction Incubation time	30 mins at 37°C.	50°C for 5min for single fragment cloning. 50°C for 15min for multiple fragment cloning.
Components	<ul style="list-style-type: none"> • 5x ReplicaExpress Buffer • Exnase II • 500bp Control Insert (20ng/ul) • pUC19 Control Vector Linearized (50 ng/μl) 	<ul style="list-style-type: none"> • 2X ReplicaExpress Mix • pCE-Zero Vector, Linearized (50 ng/ul) • 500bp Control Insert (20 ng/μl)
